University of Layyah

Bachelor of Science in Computer Science

Relevant Coursework: Data Analytics, Web Development, Database Systems, OOP

2024 – Present

Punjab, Pakistan

Zakariya Higher Secondary School & College

Intermediate in Computer Science (ICS)

Score: 1069 / 1200

2022 – 2024

Layyah

Sunrise Public High School

Matriculation (Science)

Score: 1027 / 1100

2020 – 2022

Layyah

CERTIFICATIONS

- Data Analytics Program — UpSkill (Jan 2026): Data Cleaning, Database Design, Visualization, SQL, Dashboards
- Hello Python! — Google (Coursera)
- AI for Data Analysis— Google (Coursera)
- Introduction to Front-End Development — Meta (Coursera)

TECHNICAL SKILLS

Data Analysis & Visualization: Pandas, NumPy, Seaborn, Streamlit, Looker Studio, Jupyter

Frontend Development: HTML, CSS, JavaScript, Bootstrap, Responsive Web Design

Programming: Python, SQL

Databases: PostgreSQL, MySQL, Oracle, DBeaver

Database Design: ER Modeling, 1NF, 2NF, 3NF

Tools: Git, GitHub, VS Code, Canva, Photoshop, Illustrator

Core Skills: Data Cleaning, EDA, Data Visualization, Dashboards, Business Intelligence, UI Design, Cross-Browser Compatibility, Problem Solving, Data Storytelling

PROJECTS

Global COVID-19 Analysis Dashboard | Google Looker Studio

- Built interactive dashboard analyzing global COVID-19 trends
- Visualized cases, recoveries, and mortality rates
- Designed geographical analytics across countries
- Converted raw datasets into meaningful visual insights

GitHub: <https://github.com/Nain-007sh/COVID-19-Global-Analytics-Dashboard>

Online Course Demand & Skill Trend Dashboard | Python, Pandas, Streamlit

- Developed interactive web analytics application
- Performed EDA on 3,600+ courses dataset
- Analyzed pricing, engagement, and course popularity
- Created dashboards to identify high-demand skills

GitHub: <https://github.com/Nain-007sh/Online-Course-Demand-Project>

Google Play Store Analytics Dashboard | Python, Pandas, Streamlit

- Built BI dashboard for app performance analysis
- Cleaned and transformed large datasets
- Created KPI dashboards (ratings, installs, reviews)
- Delivered insights using data visualization

GitHub: https://github.com/Nain-007sh/Google_Play_Store_Analytics

Lumen Studio | HTML, CSS, JavaScript

- Built animated landing page for a fictional creative technology studio
- Implemented custom cursor and particle hero background effects
- Added scroll-reveal animations, tilt cards, and testimonial slider

- Built entirely with vanilla HTML, CSS, and JavaScript

GitHub: <https://github.com/Nain-007sh/lumen-studio->

Aurum – Luxury Landing Page | HTML, Tailwind CSS, JavaScript

- Designed premium, fully responsive luxury brand landing page
- Styled with Tailwind CSS using a dark theme and gold accents
- Built interactive components: product cards, FAQ accordion, testimonials
- Added scroll-reveal and glassmorphism effects for a high-end feel

GitHub: <https://github.com/Nain-007sh/aurum-luxury-landing-page>
