PROFILE

Analytical and detail-oriented Computer Science undergraduate specializing in Data Science and Analytics. Demonstrated expertise in translating complex, high-volume datasets into strategic, actionable insights using Python, SQL, and advanced visualization frameworks. Adept at engineering scalable database architectures and developing interactive, data-driven web applications.

PROJECTS

Online Course Demand & Skill Trend Dashboard | *Python, Streamlit, Pandas*

- Engineered an interactive, multi-page web application to analyze e-learning market trends utilizing a large-scale dataset of over 3,600 individual courses.
- Executed end-to-end Exploratory Data Analysis (EDA) and rigorous data cleaning to evaluate pricing structures, subscriber engagement, and content duration.
- Deployed custom interactive charts to visualize subject popularity and revenue models, providing data-driven insights that assist in identifying high-demand skills.
- [Project](#)

Airline Management System Database | *SQL, ER Modeling, DFD*

- Architected and deployed a full-cycle, 3NF-normalized relational database system designed to optimize the management of airport logistics, flights, and passenger bookings.
- Designed comprehensive conceptual and logical data models, employing Crow's Foot & Chen ER Diagrams and Data Flow Diagrams (DFD Levels 0 & 1).
- Authored advanced SQL queries for efficient data retrieval, reporting, and system updates, demonstrating strong proficiency in backend data structuring and integrity.
- [Project](#)

Global COVID-19 Analysis Dashboard | *Google Looker Studio*

- Developed a high-fidelity visual dashboard tracking and analyzing global pandemic metrics, including active cases, mortality, and recovery rates.
- Translated raw health data into intuitive geographical charts, mapping New Cases and Total Cases across multiple countries and continents.

- Formulated comparative analytical views that enable quick comprehension of complex global health trends for end-users.
- [Project](#)

CERTIFICATIONS

UpSkill | Jan 2026

Completed a 5-month Data Analytics course from UpSkill. I gained hands-on experience in the complete data analysis lifecycle, focusing on database creation, storage optimization, and transforming complex datasets into actionable visual reports. These projects helped me understand how to clean and visualize data with confidence.

Professional Courses:

- **Agile Project Management** | Google (Coursera)
- **Foundations of Project Management** | Google (Coursera)
- **Introduction to Front-End Development** | Meta (Coursera)

EDUCATION

Bachelors of Science in Computer Science | 2024 - Present

University Of Layyah — Layyah, Punjab Pakistan

- **Relevant Coursework:** Data Science, Database Systems, Object-Oriented Programming.

Intermediate in Computer Science (ICS) | 2022 - 2024

Zakariya Higher Secondary School & College — Layyah, Punjab Pakistan

- **Score:** 1069 / 1200 (High Achiever)

Matriculation (Science) | 2020 – 2022

Sunrise Public High School — Layyah, Punjab Pakistan

- **Score:** 1027 / 1100

ADDITIONAL SKILLS

- **Technical Skills:** SQL, Python (Pandas, Streamlit, Numpy), Google Looker Studio, Jupyter Notebooks.
- **Databases & Modeling:** PostgreSQL, MySQL, Oracle Database, DBeaver, ER Modeling, 3NF Normalization.
- **Tools:** Version Control (Git, GitHub), Canva, Adobe Photoshop, Adobe Illustrator.
- **Languages:** English, Urdu
