PROFILE

Analytical and detail-oriented Computer Science undergraduate specializing in Data Science and Analytics. Skilled in transforming complex datasets into actionable insights using Python, SQL, Pandas, NumPy, and modern visualization tools. Experienced in data cleaning, exploratory data analysis (EDA), dashboard development, database design, and business intelligence reporting. Passionate about leveraging data-driven decision-making to solve real-world problems and continuously expanding expertise in analytics and emerging data technologies.

PROJECTS

Online Course Demand & Skill Trend Dashboard | Python, Streamlit, Pandas

- Developed an interactive analytics web application utilizing a dataset of over 3,600 online courses.
- Performed end-to-end Exploratory Data Analysis (EDA) and comprehensive data cleaning to evaluate pricing models, subscriber engagement, and content duration trends.
- Created dynamic visualizations and dashboards to identify high-demand skills and emerging trends within the e-learning market.
- Delivered actionable insights through interactive reporting and business-focused analytics.

[Project Link](#)

Google Play Store Analytics Dashboard | Python, Streamlit, Pandas

- Built a professional business intelligence dashboard for analyzing Google Play Store applications and market performance.
- Conducted large-scale data cleaning, transformation, and exploratory data analysis.

- Designed KPI-driven dashboards to monitor ratings, installs, reviews, app categories, and engagement metrics.
- Generated business insights through interactive visualizations and analytical storytelling.

[Project Link](#)

Global COVID-19 Analysis Dashboard | Google Looker Studio

- Developed an interactive dashboard tracking and analyzing global pandemic statistics, including active cases, mortality rates, and recoveries.
- Transformed raw health datasets into geographical and comparative visualizations across multiple countries and regions.
- Created analytical reports enabling quick understanding of global health trends and pandemic patterns.
- Applied data storytelling principles to enhance accessibility and interpretation of complex datasets.

CERTIFICATIONS

UpSkill | Jan 2026

Completed a 5-month Data Analytics program focused on the complete data analysis lifecycle, including database design, storage optimization, SQL querying, data cleaning, visualization, dashboard development, and business reporting. Gained hands-on experience working with real-world datasets and transforming raw information into actionable insights.

Professional Courses

- Agile Project Management | Google (Coursera)
- Foundations of Project Management | Google (Coursera)
- Introduction to Front-End Development | Meta (Coursera)

EDUCATION

Bachelor of Science in Computer Science | 2024 – Present

University of Layyah — Layyah, Punjab, Pakistan

- Relevant Coursework: Data Science, Database Systems, Object-Oriented Programming

Intermediate in Computer Science (ICS) | 2022 – 2024

Zakariya Higher Secondary School & College — Layyah, Punjab, Pakistan

- Score: 1069 / 1200

Matriculation (Science) | 2020 – 2022

Sunrise Public High School — Layyah, Punjab, Pakistan

- Score: 1027 / 1100

TECHNICAL SKILLS

Programming Languages

- Python
- SQL
- HTML
- CSS

Data Analysis & Visualization

- Pandas
- NumPy
- Seaborn
- Streamlit
- Google Looker Studio
- Jupyter Notebook

Databases & Data Modeling

- PostgreSQL
- MySQL
- Oracle Database
- DBeaver
- ER Modeling
- Database Normalization (1NF, 2NF, 3NF)

Tools & Technologies

- Git
- GitHub
- Visual Studio Code

- Canva
- Adobe Illustrator

Core Competencies

- Data Cleaning
- Exploratory Data Analysis (EDA)
- Dashboard Development
- Business Intelligence Reporting
- Data Visualization
- Problem Solving
- Analytical Thinking
- Data Storytelling

LANGUAGES

- English
- Urdu
